# NANOTEK AUTOMOBILE COATING

NanoTek Solutions™ provides coatings that can be used to protect the exterior as well as the interiors of an Automobile.

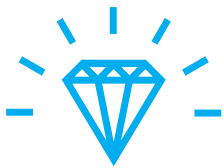

**Our unique Automobile coating provides a new car feeling in just 4 steps :**

## 1. Deep Cleaning (Interior & Exterior)

Our deep cleaning service includes:

- Washing the car body, windscreen, windows, sunroof & wheels
- Removing paint & cement marks without scratching
- Shampooing/Vacuumping car seats, dashboard & other accessories
- Shampooing/Vacuumping car mats

## 2. Car Body Polish, Seal & Shine

Our Car Body Polish, Seal & Shine coating provides an easy-to-clean effect on car body surfaces. Our unique coating bonds with surface and greatly reduces the ability of dust, mud, water, bird droppings and other pollutants from sticking onto it easily. In fact, water readily pearls off the surface taking dirt and other pollutants with it.

## 3. Windscreen & Window Coating

Our Windscreen & Window Coating makes the surface super hydrophobic. The coated surface displays a high ability to repel water & dirt. Once treated it will completely enhance your wet weather driving experience by improving visibility to a point where windscreen wipers are virtually redundant. It leads to less driver stress, more comfortable driving and enhanced safety.

## 4. Interior Car Seat Coating

NanoTek Automobile Interior Textile coating protects automotive fabrics and textiles from water, dirt, contaminant and stains without altering its original look & feel. Our unique coating completely bonds with the surface making it water and stain repellent. Unlike other coatings our coating is colorless & odorless and can be applied on all types of textiles (leather, suede, rexin, cotton etc) without changing its appearance.

Common Areas of Application: Car seats, Dashboards, Convertible Roofs and any other

### Other NanoTek Solutions Offerings:

Furniture Coating | Marble Coating | Stone Coating  
Glass Coating | Wood Coating | Handbag Coating
